# skyswitch

SkySwitch Partner Video Instructions

**1** Open the Video Template Link

Open the template link for the video you would like to edit.

2 Find the Intro/Outro Screens

The beginning and end of the video provide a brief white screen for you to place your logo.

3 Edit or Extend the Intro/Outro Screens

You can extend the beginning and end of the video by extending the white solid layer. Extend the white screen based on the duration you would like.
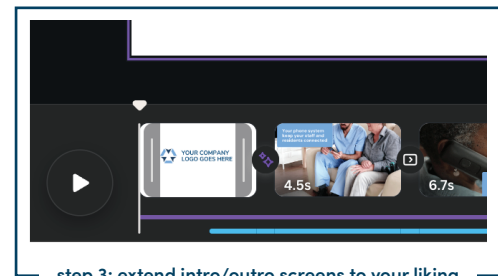

4 Add your Logo

Upload and add your logo to the intro and outro screens by dragging and dropping them over the white solid layers.

5 Edit Text and Video Clips

You are free to replace stock video clips with your own by uploading them into canva and dragging and dropping them over the current video clips. Text can be edited by clicking on the current text in the video.

6 Add Transition Effects

You can add transition effects in between scenes. Click on the icon in between each video scene in the editor to apply a transition.

7 Export

Save your video and export it for use.

step 1: open the template link

step 3: extend intro/outro screens to your liking

step 5: edit text within the video
