

# Website Copy for the Legal Vertical

*The following is copy you can use on your website for an industry page targeted to law firms. You can use the below “as is” or leverage it as a foundation to your legal vertical website page and customize it based on your business and offering.*

## Focus on your clients, not your phone system.

Your firm advises and represents clients, which makes communication systems a critical part of your business. And with lawyers and associates working both in the office and on the go, your phone system must support their needs wherever they are. You don't need a lot of fancy bells and whistles, but you do require high quality—in both service and equipment—and simplified management for it all.

## Get the system that understands YOUR needs.

You're not just any business—as a law firm, you have some specific requirements to support the nature of your operations and protecting your reputation is top of mind. For example, assistants need to be able to answer incoming calls for each attorney. Your attorneys need to be able to use their mobile phones for calls and texting without divulging their personal cell numbers. If you have multiple offices, you need to enable easy inter-office communications with simplified management, and if you run a call center, you need to ensure you never miss a call.

Our cloud-based phone system provides you the quality and features you need and rely on, delivered cost-effectively and with simplified management.

### Key features:

- Rock-solid call quality and service dependability
- Account codes for billing
- Voicemail transcription
- Premium phones and accessories
- Integration with law firm software
- Mobile app that supports remote and on-the-go work
- Business texting that protects cell number privacy
- Call center that delivers a high-quality experience
